

Natural Hormonal Enhancement

About the Author	i
Forward	iii
Note from the Author	v
Acknowledgements	vii
Preface: My Story	ix
Dedication	xiii

Chapter 1

Is Anti-Aging Unnatural or is Aging Unnatural	1
--	---

Chapter 2

Biological Aging vs. Chronological Aging	3
---	---

Chapter 3

Growth Hormone and the Hormonal Revolution	5
References	9

Chapter 4

Putting Your Hormonal Army to Work for You	11
I. Hormonal Synergy	11
A. Growth Hormone and Testosterone.....	11
B. Growth Hormone and Estrogen.....	12
C. Hormone Replacement or Not?.....	12
<i>Report - The Question Every Woman Faces: Estrogen Replacement or Not?</i>	13
D. Somatopause vs. Menopause	14
E. Reversing Growth Hormone Decline	14
II. Principles of Natural Hormonal Enhancement: An Overview.....	15
A. Muscle Axis and Fat Axis: The Conceptual Foundation.....	16
1) Muscle Axis	16
a. Anabolic Hormones	16
b. Catabolic Hormones.....	16
2) Fat Axis	17
a. Lipogenic Hormones.....	17
b. Lipolytic Hormones	18
B. Taking a Turn for the Hears, or Turning Back the Clock?.....	18
C. Natural Hormonal Enhancement Strategy in a Nutshell.....	20
References	21

Chapter 5

You Can Learn a Lot from an Ancient Warrior:	
Looking Back to Prehistory to Unlock Secrets to Super-Health	24
A. A Departure from the Ancient Warrior Diet: Throwing Your Hormones a Curve.....	27
B. The Modern Day Ancient Warrior.....	29
References	30

Chapter 6

The Misinformation Age	32
References	36

Chapter 7

The Truth Can Hurt, But the Absence of Truth Can Kill 37
 References 42

Chapter 8

You Broil, Never Fry, But You've Been Living a Lie 44
 I. Appealingly Simple and Intuitively Inviting 45
 II. Hormones Regulate Cholesterol and Triglyceride Levels 46
 III. Examining History and Other Cultures 51
 IV. Ignore-ance Defeats Truth and Causes Death 54
 V. In a Nutshell, Here's What You Need to Know about Dietary Fat: 57
 VI. Sugar-Burner or Fat-Burner? 57
 References 58

Chapter 9

**The Key to Permanent Fat Loss:
 Working with Your Body, Not Against It**..... 65

I. Calorie Restriction - A No-Win Proposition 65
 II. "Wasting" Calories 66
 III. Overriding Your Fat Setpoint 67
 IV. The Calorie Theory Refuted 68
 V. Counting Calories is Strictly Prohibited 69
 VI. Fat Consumption and Hormonal Hunger: A Disastrous Combination 70
 References 71

Chapter 10

The Hormonal Response to Food 75
 I. Insulin and Glucagon: Opposing Forces in the Kingdom of Metabolism 76
 A. The Insulin Mechanism: How it Works 77
 1) Insulin as Fat-Builder 77
 2) Insulin as Muscle-Builder 78
 B. The Glucagon Mechanism: How it Works 78
 1) Glucagon as Fat-Burner 79
 2) Glucagon as Muscle-Destroyer 79
 C. Macronutrient Hormonal Triggers 80
 II. Avoiding Spillover and the Conveyor-Belt Problem 81
 A. Cycle Carbohydrate to Avoid Spillover 81
 B. Divide and Conquer to Avoid the Conveyor-Belt Problem 82
 III. High Insulin Dropkicks Energy Levels 82
 A. Insulin Bars Access to the Supreme Fuel Source 82
 B. High Insulin Dulls Mental Acuity 83
 References 84

Chapter 11

Dietary Strategies for: Reshaping Your Body • Combating Aging • Subduing Cravings • Increasing Energy Levels • Improving Athletic Performance • Promoting Health.....87

- I. Reshaping Your Body and Combating Aging87
 - A. Maximum Fat Loss Without Sacrificing Lean Body Mass87
 - Using Your Muscles to Turn Back the Hands of Time88
 - Report* - Women and Muscles89
 - B. The Anabolic, "Construction," Effect.....89
 - Report* - Anabolic Hormones in Action: Growth Hormone and Insulin - Adversaries in Partnership.....90
 - C. Protecting Protein: The Anti-Catabolic, Anti-Aging, Effect.....91
- II. Increasing Energy Levels and Improving Athletic Performance.....92
 - A. High Energy Levels while Losing Bodyfat.....92
 - B. The "Metabolic Advantage" in the Gym - More Fat Loss from Exercise.....93
 - C. For Athletes and Bodybuilders: Avoiding the Pitfalls of Cutting Weight, and Making Steady Progress Competition to Competition, Year to Year.93
- III. Promoting Health96
 - Avoiding the Health Problems Associated with Conventional Dieting (While Enjoying the Health Benefits of the NHE Eating Plan)96
- IV. Subduing Cravings97
 - A. The Psychological Edge.....97
 - B. Real Hunger vs. Hormonal Hunger: A Critical Distinction97
 - 1) Real Hunger.....98
 - 2) Hormonal Hunger.....99
 - a. When Blood Sugar Goes South.....100
 - b. Serotonin Confusion: That Which Goes Up Must Come Down102
 - Report* - Can a High-Carbohydrate Diet Lead to Serotonin Depletion?.....103
- References104

Chapter 12

Monitoring Your Progress.....111

- I. Bodyfat Testing111
 - A. Hydrostatic Weighing111
 - B. Caliper Testing.....112
 - C. Bioelectric Impedance.....112
 - D. Near-Infrared Interactance.....113
- II. The Clothes Knows113
- III. The Way to Weigh113
- IV. How You Feel115
- References116

Chapter 13

Getting Started: Making the Metabolic Shift.....117

- I. Getting Out of the Sugar-Burning Mode117
- II. The Metabolic U-Turn118
 - A. How Much Carbohydrate?.....118
 - B. What to Eat during the First Seven Days.....118
 - What about Vegetarians and Vegans?.....119
 - C. What Not to Eat119
- III. Changing Your Body Requires Changing Your Mind.....119
 - Eating Affirmations.....121

Chapter 14

The Natural Hormonal Enhancement Eating Plan:

A Lifetime Dietary Strategy	122
I. Introduction to Macronutrient Cycling.....	122
<i>Report - Enter the Third Dimension</i>	123
II. Standard Fat-Burning Meals (Downcycle).....	124
Functions of Standard Fat-Burning Meals.....	124
III. Carb-Load Meals (Upcycle).....	125
A. Functions of Carb-Load Meals.....	125
IV. What to Eat and When to Eat.....	127
A. The Standard Fat-Burning Meals.....	127
B. Hierarchy of Eating Priorities for Standard Fat-Burning Meals.....	128
V. Drink a Lot of Water.....	128
A. Warriors Don't Drink Soda Pop.....	128
B. Water for Fat Loss and Health.....	129
C. Is Water Anabolic?.....	130
VI. The Bodybuilders' NHE Eating Plan: A Dietary Strategy for Maximum Muscle Growth.....	131
A. Upcycle (Carb-Load Meals).....	133
B. Downcycle (Standard Fat-Burning Meals).....	134
1) Carbohydrate.....	134
2) Protein.....	134
3) Fat.....	134
C. The Cyclical High-Fat Diet in Historical Context.....	136
References.....	136

Chapter 15

The Carb-Load	138
I. Benefits of the Carb-Load.....	139
II. When to Carb-Load.....	139
A. Splitting the Carb-Load.....	140
B. The Maintenance Plan.....	141
III. What to Eat When You Carb-Load.....	141
A. What about Fat?.....	141
B. Carbohydrate Partitioning.....	143
C. What about Protein?.....	144
D. Starchy Carbs vs. Sugary Carbs.....	144
Review: What to Eat When You Carb-Load.....	146
References.....	146

Chapter 16

Thermogenesis: The Science of Using Food to Increase Metabolism	149
I. Reducing "Actual" Calories.....	149
II. Thermogenic Foods.....	151
A. Fruits and Vegetables.....	151
B. Protein Foods.....	153
References.....	154

Chapter 17

Protein Optimization and Meal Frequency	156
<i>Report - Optimization: A Recurring Theme of Natural Hormonal Enhancement</i>	157
I. How Much to Consume?.....	157
II. Maximizing Absorption.....	160
III. Meal Frequency.....	161
References.....	163

Chapter 18

Using Dietary Fat to Burn Bodyfat..... 165

I. How Much is Moderate?..... 168

II. Good Fat 170

Report - Eicosanoids: The Master Key to Disease - and its Prevention 171

 A. Monounsaturated Fat and the Oil Controversy..... 171

 B. Saturated Fat vs. Polyunsaturated Fat: A Critical Reassessment 173

 C. Trans Fatty Acids: Mutant Child of Technology 174

Report - Butter vs. Margarine:
 Making Sound Health Choices in the Sound-Byte Era..... 176

 D. Omega 3..... 177

Report - Healthy Bacon? 178

Report - To Flax or Not to Flax..... 179

References 180

Chapter 19

Common Mistakes and How to Avoid Them..... 187

I. Witch's Brew, Misplaced Loyalty, and the Felt Need to Conform..... 187

II. Don't Get Nickel and Dimed to Death by Hidden Carbs 188

III. Be Proactive, Not Reactive..... 189

IV. Snacking: When and Why..... 190

V. Snacking: What and How..... 191

Report - Better Living Through Better Brain Chemistry: Using Food to
 Enhance Mental Performance and Emotional Well-Being 193

References 194

Chapter 20

Lifestyle Factors: Small Modifications Can Make a Major Difference in Your Hormonal Status..... 195

I. Stress and Mental Outlook 195

II. Sleep 199

III. Sunlight 203

Report - Rickets: An Osteoblast from the Past..... 207

IV. Alcohol..... 210

Report - Is Alcohol an Aphrodisiac?..... 213

V. Cigarette Smoking..... 215

VI. Sex and Relationships 216

References 217

Chapter 21
Hormonally-Intelligent Exercise..... 234

I. Popular Exercise Myths 234

II. A New Dimension in Exercise 235

III. Bioenergetic Pathways 236

IV. The Pre- Workout Meal: Priming the Hormonal Environment..... 238

Report - The Glycemic Index Should Not be Accidentally Overlooked,
 Rather it Should be Deliberately Disregarded..... 239

Report - Warning! You Can't Trust What You Read in
 Fitness Magazines..... 240

V. The Post-Workout Meal: More of the Same, Please..... 242

Report - How to Save Tons of Money by Making Your Own Homemade
 Performance Drink that Blows Away Anything You'll Find in
 Health Food Stores!..... 243

VI. What Kind of Exercise Should You Do?..... 244

Report - Resistance Training as a Means of Warding-Off the Deadly Crippler ... 247

The Times, They are A-Changin' 248

Report - A Quick Word about Personal Trainers..... 249

VII. The Six Exercise Variables..... 249

A. Exercise Selection..... 249

B. Frequency..... 250

C. Load 251

D. Intensity..... 252

1) Effort Intensity (e-intensity)..... 252

2) Relative Intensity (r-intensity) 253

3) Anabolic Intensity (a-intensity)..... 254

E. Duration..... 255

F. Volume..... 255

1) Excess Volume Impacts Sex Hormones..... 256

2) Excess Volume Reduces Thyroid Output 256

VIII. The Relationship between Exercise Variables and Hormonal Responses 256

Growth Hormone 256

Cortisol 257

Insulin 257

Testosterone 257

A. Modulating Intensity for Maximum Growth Hormone Release 259

B. Synchronizing the Duration of Your Workouts to Hormonal Responses 261

Report - Training Secrets from Across the Iron Curtain 263

IX. The Effect of Recovery Periods on Hormone Levels 264

X. Interval Training for Hormonal and Cardiovascular Enhancement..... 267

Report - Examining the Conventional Wisdom on How to Exercise for
 Maximum Fat Loss..... 267

XI. The Interval Paradigm Applied to Resistance Training.....	270
XII. Adaptation to Stress.....	270
A. Principles of Stress Adaptation.....	271
B. Adaptations are Stress Specific.....	271
<i>Report - Exercise Selection and All-in-One Home Fitness</i>	
Devices.....	273
XIII. Strategic Stress.....	273
XIV. The Principle of Progressivity.....	274
XV. General Hormonal Response to Exercise.....	275
Bringing it all Together: "How Adaptation to Stress" and "Progressivity" Relate to Hormones ...	276
<i>Report - Does Increased Exercise Tolerance Mean You Should</i>	
Weight Train More Frequently?.....	278
XVI. Growth Hormone Response to Exercise: Critiquing Training Routines.....	278
Hypothetical #1.....	278
Hypothetical #2.....	279
Hypothetical #3.....	281
XVII. The Hyperadaptive Period (Beginner and Early Intermediate Stages).....	281
<i>Report - Why Layoffs are Often More Helpful than Harmful</i>	282
XVIII. Progressing Beyond (Late Intermediate and Advanced Stages).....	284
XIX. Qualitative Progression.....	285
<i>Report - Apollo's Creed</i>	285
Progression = Progress.....	286
<i>Report - Qualitative Progression is Good for the Brain</i>	287
XX. Testosterone Response to Exercise.....	287
<i>Report - Steroids and Testosterone Levels</i>	291
Testosterone Dynamics and the Effect on Muscle Growth and Sex Drive.....	291
XXI. Guidelines for Structuring a Hormonally-Intelligent Weight Training Routine.....	293
A. Don't Lift Weights Every Day.....	293
B. Recovery Requires Energy.....	293
C. What about Weight Training Two Days in a Row?.....	295
D. Bodypart Groupings and the Split-Routine.....	296
Review: Guidelines for Structuring a Hormonally-Intelligent Weight Training Routine.....	296
XXII. Practical Applications.....	298
Hypothetical #1.....	298
Hypothetical #2.....	299
Hypothetical #3.....	301
XXIII. Overtraining vs. Undertraining.....	302
XXIV. Becoming Attuned to Your Body.....	303
A. Immunity.....	303
B. Waking Heat Rate.....	305
C. Exercise Performance.....	305
D. Sleep Quality.....	305
E. Mood.....	306
XXV. Warm-Up.....	306
XXVI. Organizing Your Workout: The Order of Operations.....	307
A. Should You Do Aerobic Exercise on the Same Day You Weight Train?.....	307
B. How to Structure a Workout to Include Both Weight Training and Aerobic Exercise.....	307
C. Which Should You Do First in a Dual Workout, Weight Training or Aerobic Exercise?.....	308
Review - Organizing Your Workout: The Order of Operations.....	308
XXVII. Biomechanics.....	309
Example 1 (Bench Press).....	309
Example 2 (Squat).....	309
References.....	311
